

Getting started, one step at a time

Seven steps to set up your family board, approve real work, pay it out, and run the sixteen-week Family Money Course.

Start your family account

You are the Commander. Your account holds the family, the money settings, and every child profile under it.

- ▶ Sign up with your email and a password, or continue with Google.
- ▶ Agree to the terms as the parent or legal guardian.
- ▶ Founder or ambassador code? Add it here before you create the account.

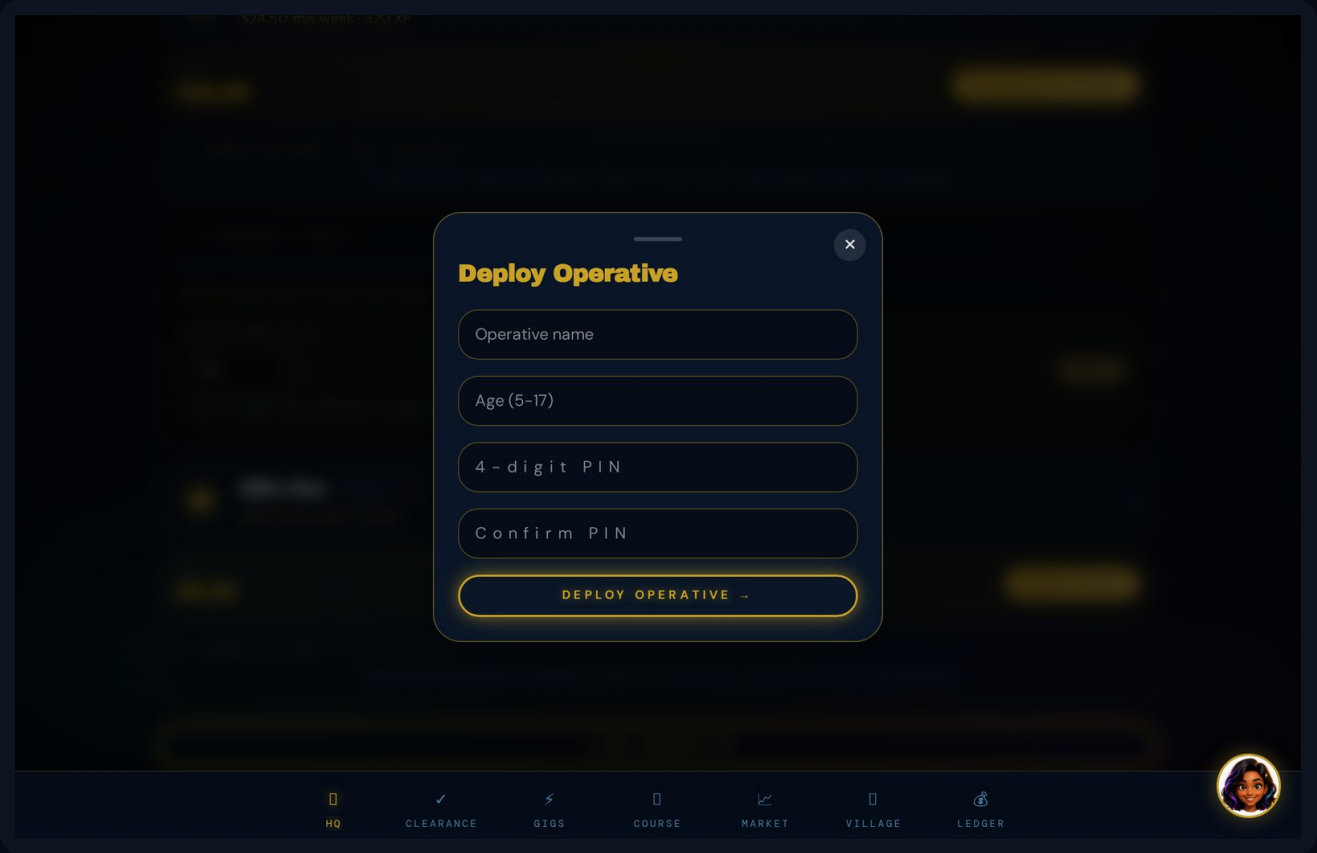

The screenshot shows the HustleBoard 'Create Account' interface. At the top, the HustleBoard logo is displayed next to the text 'HUSTLEBOARD'. Below this, the text '// COMMANDER ACCESS' is shown. The main heading is 'Create Account'. The form contains several input fields: 'EMAIL', 'PASSWORD', and 'CONFIRM PASSWORD', each with a toggle icon for visibility. Below the password fields, there is a checkbox for agreeing to the Terms of Service and Privacy Policy, with a note that the user must be at least 18 years old and acting as a parent or legal guardian. There are also two optional fields for 'FOUNDER ACCESS CODE?' and 'AMBASSADOR CODE?'. At the bottom of the form is a 'CREATE ACCOUNT' button. A small circular profile picture of a woman is visible in the bottom right corner of the form area.

Deploy your operatives

Each child gets their own profile, their own board, and their own private login. No email needed for kids.

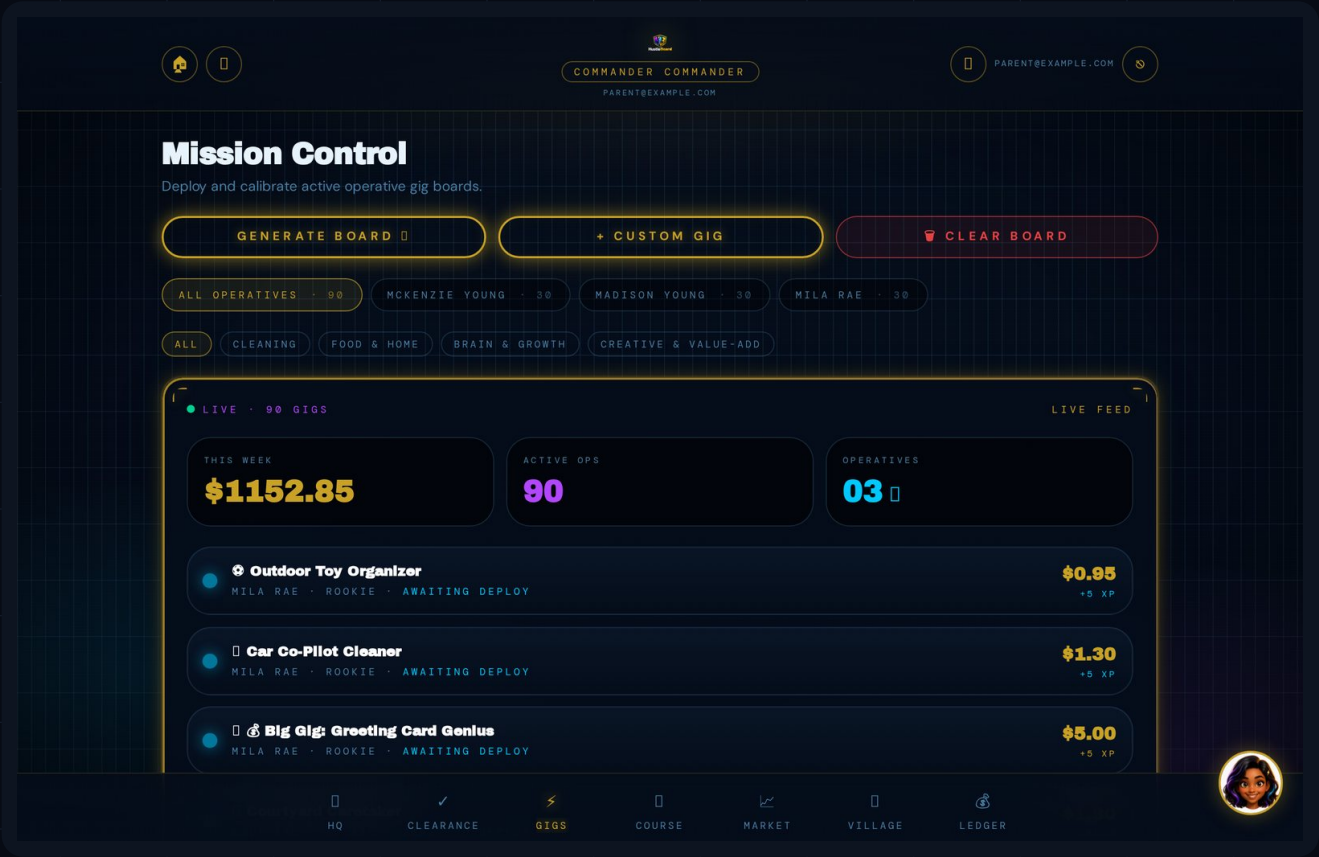

- ▶ Enter their name and age so the board and course match their level.
- ▶ Set a 4-digit PIN they will use to sign in.
- ▶ They log in with your family code plus that PIN.

Put the work on the board

Mission Control is where the gigs live. Generate a full board in one tap or write your own gigs with your own values.

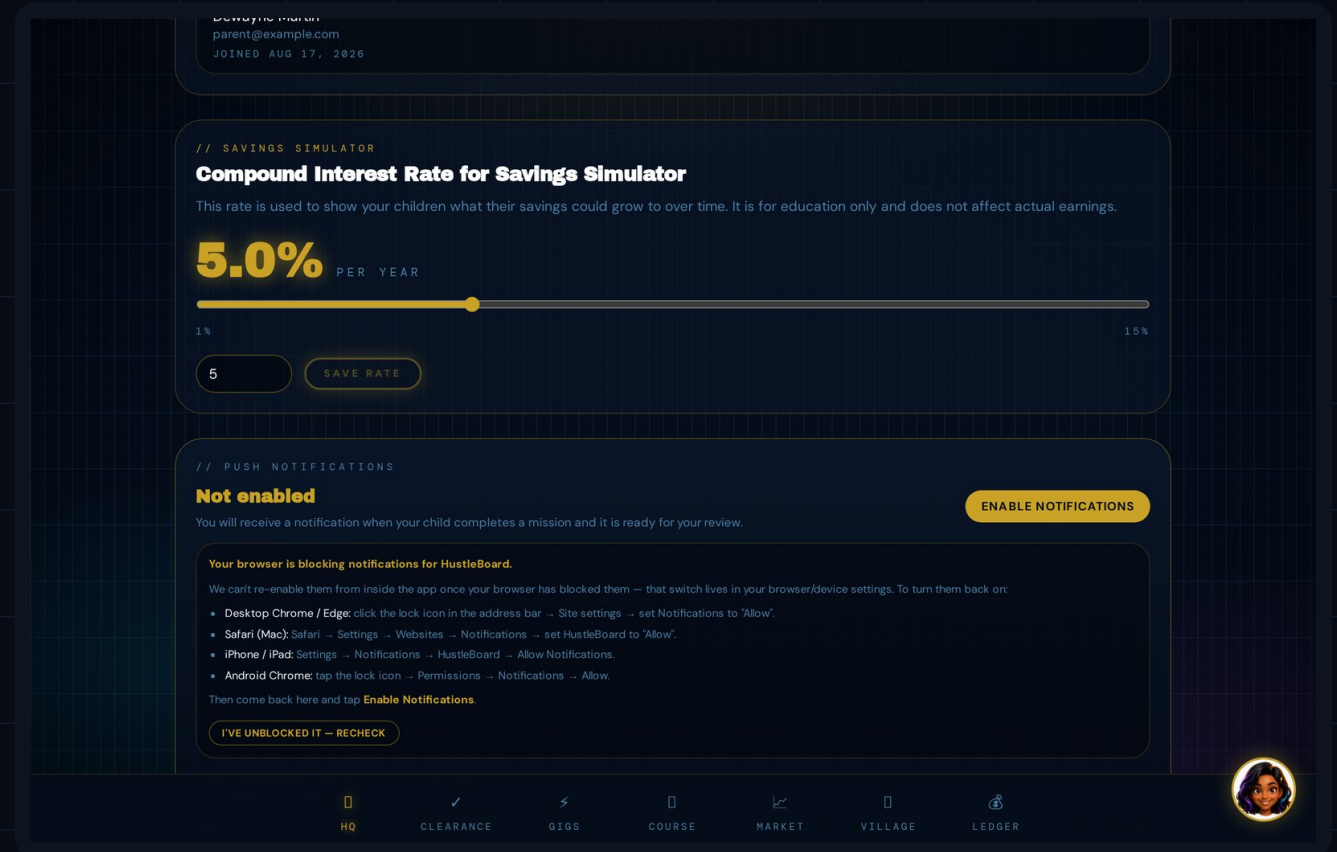

- ▶ Generate Board builds age-appropriate missions for each child.
- ▶ Custom Gig lets you add anything specific to your home.
- ▶ Filter by child or category to keep the board balanced.

Decide how the money behaves

You control the rules of the money before a single dollar moves. Earnings split into spend, save, and grow automatically.

- ▶ Set the savings simulator rate so kids can see growth over time.
- ▶ Set weekly earning caps and payout ranges per child.
- ▶ Turn on notifications so you know the moment work is submitted.

Clear the missions they finish

Nothing pays out until you say so. Kids submit their work, with a photo when you require one, and it lands in Clearance.

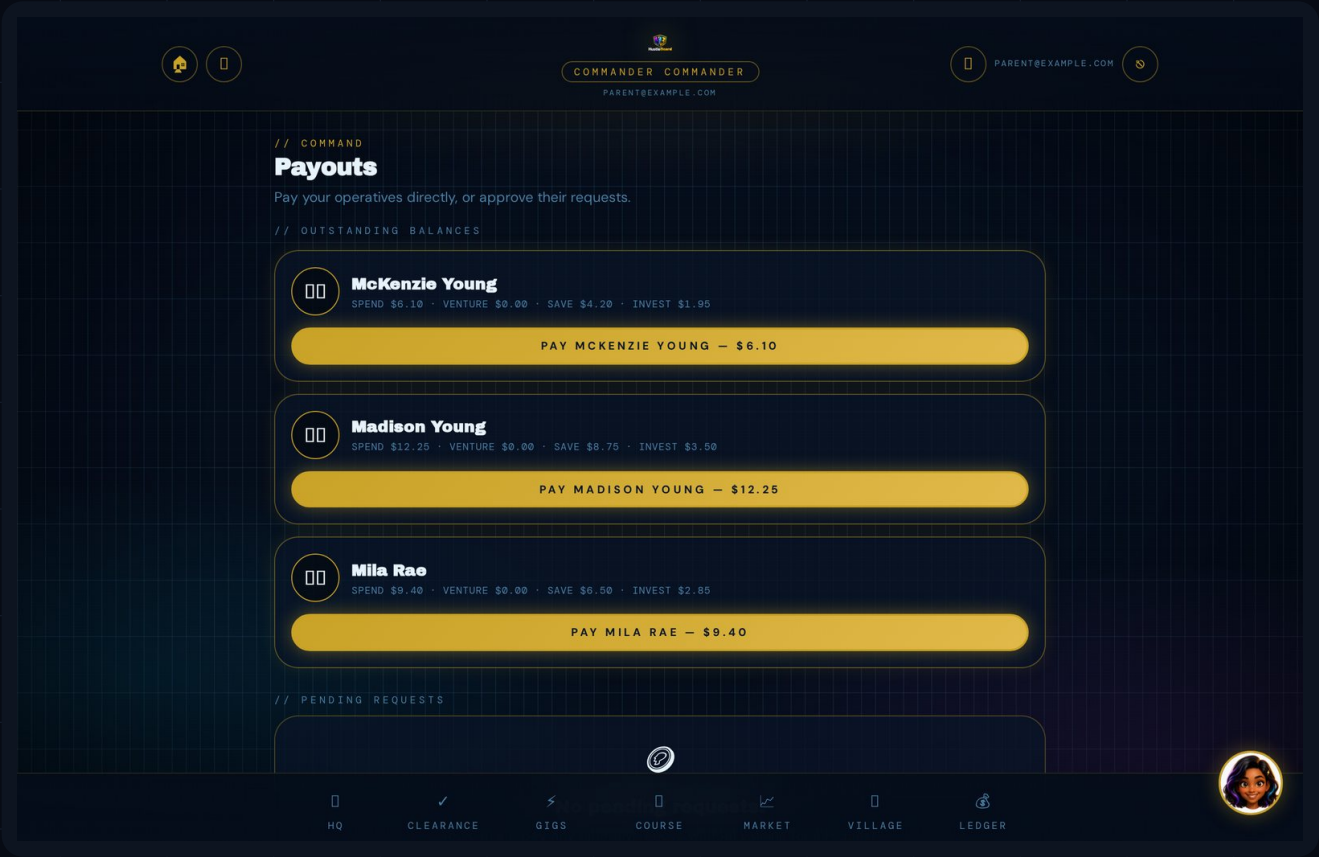

- ▶ Review each submission with the photo proof attached.
- ▶ Approve to credit the earning and award XP.
- ▶ Send it back with a note when it is not done yet.

Pay it out, one tap

You choose how you actually pay: cash, transfer, or the value you already give them. HustleBoard tracks the math.

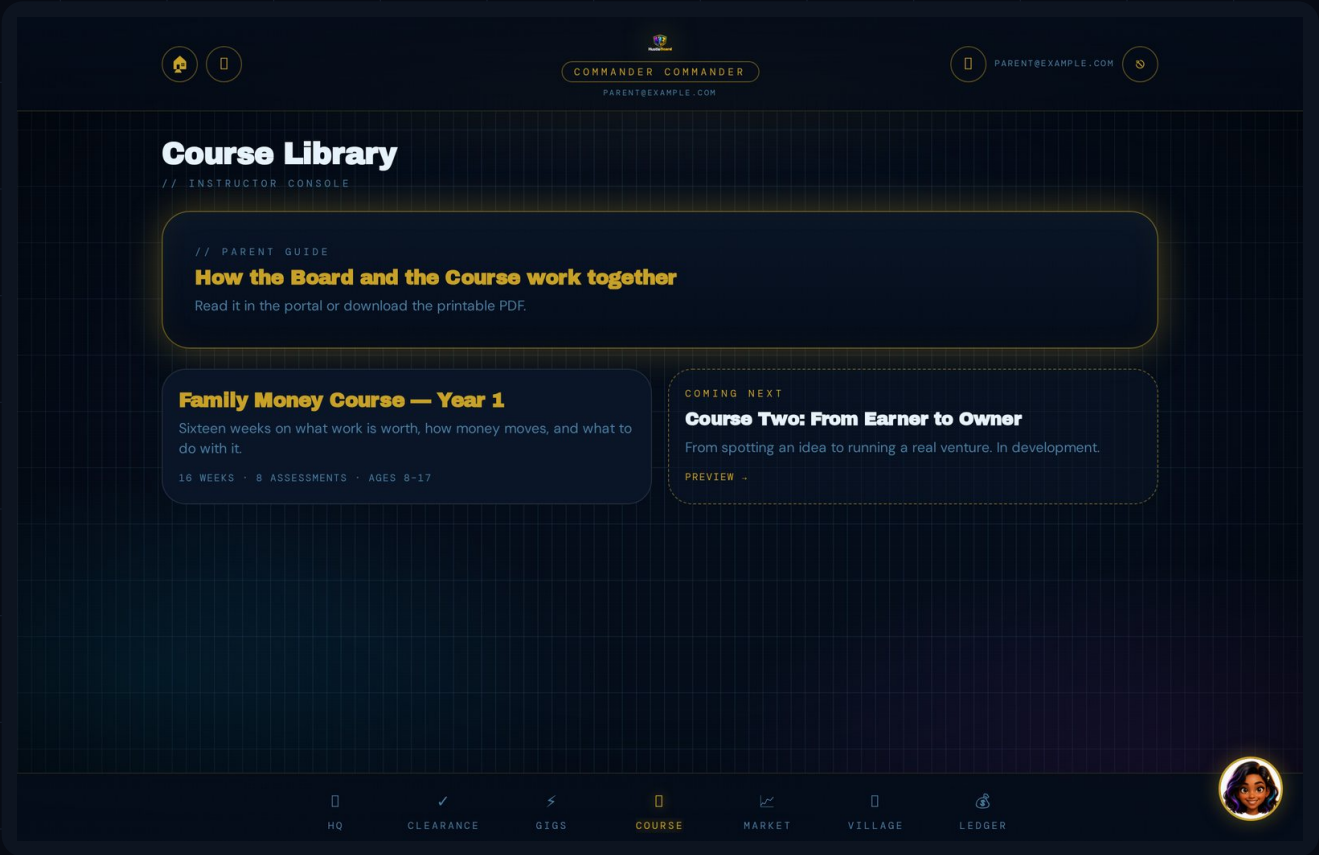

- ▶ See the outstanding balance for every child, split by bucket.
- ▶ Pay one child, or clear everyone at once with Pay Operatives.
- ▶ Every payout lands in the Ledger so nothing is guesswork.

Teach the why behind the money

The board teaches effort. The sixteen-week Family Money Course teaches what to do with what they earn.

- ▶ Release a week at a time and follow along in the instructor console.
- ▶ Lessons and quizzes adjust to each child's age band.
- ▶ Print the parent guide and workbook whenever you want paper.

That is the whole system.

Post the work. Approve it. Pay it. Let the course teach the rest. Your children learn money the way it actually sticks, by doing.
